

Duke-American Transmission Co.

Developing strategic transmission infrastructure across North America

Duke-American Transmission Co. is a transmission developer equally owned by Duke Energy, the largest electric power holding company in the U.S., and American Transmission Co., the nation's first multi-state transmission-only utility. DATC was formed in 2011 to build, own and operate electric transmission facilities in North America.

Our vision

DATC has a vision for transmission development that:

- Improves electric system reliability,
- Increases grid efficiency, thus reducing energy delivery costs,
- Improves access to the wholesale electricity market for local distribution

companies, which can pass savings on to electric consumers, and

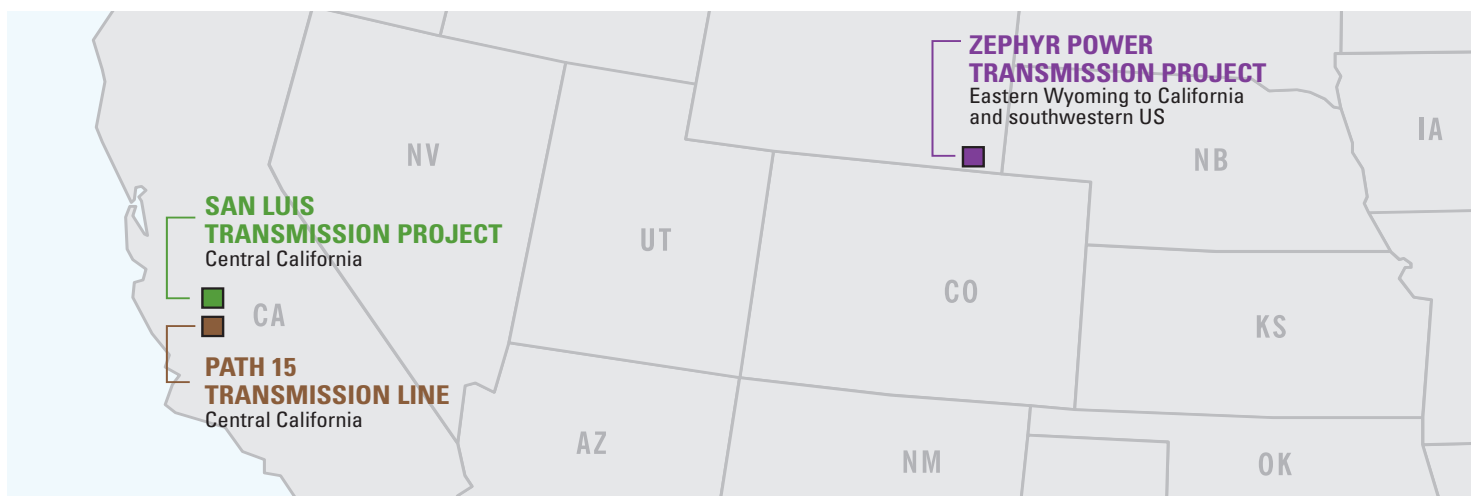

- Supports public policy energy goals by cost-effectively bringing high-quality renewable resources to market.

Building a 21st century grid

DATC believes that well-designed transmission projects afford customers, regulators and other key stakeholders superior flexibility as they determine which energy resources can help meet the demand for electricity in the decades to come. Sound transmission infrastructure also can serve as a springboard for next-generation energy technologies.

Projects and assets

- **Path 15 Transmission Line:** 84-mile, 500-kV transmission line in central California that plays a key role in maintaining statewide electric system reliability and market efficiency
- **San Luis Transmission Project:** Proposed 62-mile, 500-kV transmission line in California that would minimize expected power delivery cost increases
- **Zephyr Power Transmission Project:** Proposed 500-kV high-voltage direct-current line to deliver abundant Wyoming wind energy to communities in the southwestern U.S.

- Nation's largest electric power holding company, serving 7.3 million customers in six states
- Approximately \$118.5 billion in assets (as of Aug. 6, 2015)
- Owns and operates 32,400 miles of transmission lines
- Transmission-owning member of MISO and PJM regional transmission organizations
- Identified \$8 billion of transmission infrastructure projects, including one approved MISO Multi-Value Project
- Headquartered in Charlotte, N.C.
- Employs 29,000
- Founded in 1904
- Fortune 250 company listed on the New York Stock Exchange under symbol "DUK"

- Formed in 2001 as the nation's first multi-state transmission-only utility
- \$3.8 billion in assets
- Invested \$3.5 billion in building more than 2,400 miles of transmission lines over the past 14 years in four Midwestern states: Wisconsin, Michigan, Minnesota and Illinois
- Projecting \$3.7 billion to \$4.5 billion in transmission infrastructure projects over the next decade in current service area, including three MISO Multi-Value Projects
- Excellent track record of project approvals
- Owns and operates more than 9,530 miles of transmission lines and 530 substations
- Headquartered in Wisconsin with more than 650 employees
- Transmission-owning member of MISO
